

## Mortgage adviser

Empire building: Crown's lands have expanded like Queen Victoria's

# Crown expands business

Crown Mortgage Management, a multi-national mortgage servicer, has announced an expansion of its business.

Following the appointment of 20 new staff the mortgage originator, which was the first European servicer to be rated by Standard & Poor's and Fitch and Moody's, plans to extend its head office in Ipswich.

Crown, which currently employs 108 staff, is extending its base by an additional 1300 square footage of office space, in order to help accommodate its latest recruitment drive.

The worldwide group specialises in the management of performing and non-performing commercial and residential mortgage loans.

Julien Holmes, managing director of Crown Mortgage Management, said: "So far in 2008 Crown has won three new clients and taken on seven new mortgage portfolios.

"We are delighted to be able to open a brand new office and recruit the extra staff needed to accommodate this recent business growth.

"At Crown we are strongly committed to retaining the best talent possible, so we look after our employees with staff incentives and training programmes. As a result of this our staff turnover is very low."
